

## PREFACE

As the higher education sector in our country undergoes a significant transformation, the UG Economics Board of Studies has been entrusted with the important responsibility of restructuring the curriculum and syllabus of the undergraduate program. The core objective of this restructuring effort is to facilitate academic excellence by fostering research aptitude. Additionally, an equally important goal for the Board of Studies was to integrate two essential, interconnected elements of higher education—employability and skill formation. As we recognize, alongside broader objectives such as character building and value education, the aspect of employability has become an increasingly compelling element of higher education in recent years.

The programme is structured with Major and Minor courses (DSC, DCC, DCE, DSE etc), Multi-Disciplinary Courses (MDC), Skill Enhancement Courses (SEC), Value Added Courses (VAC), Internship and Research Projects.

While focusing on human economic behaviour and economic trends, the programme focuses on creating and disseminating knowledge that is suited to the 21st century. Cases in point are the courses on economic data analysis, digital economy and business transformation, fintech entrepreneurship, risk analysis, artificial intelligence and economics of innovation and technological change. Being a social science discipline blessed with higher adaptability to the usage of scientific tools, economics curriculum can be fruitfully customized to meet the skill formation demands. Realising this, the Board of Studies has adopted an interdisciplinary approach for some courses, and this can be observed from the content of the courses which often demand the use of computer labs. Another unavoidable dimension was to address the environmental issues that we are confronting now. Here, the Board of Studies has tailored several courses including a course on environmental and social governance.

An important mission of the Board of Studies was to impart skill and that also lying within the peripheries of social science discipline. Here, Board of Studies is confident that the newly introduced skill courses like Digital Economy and Business Transformation will effectively serve as a template for others to follow.

Courses such as the two-part economic analytics, security analysis and portfolio management are certain to make the students skilled in financial and policy analyses.

For students from non-economic backgrounds, the Board of Studies has prepared balanced and exceptionally useful courses that provide economic specific skills and knowledge so that they can complement these with their core courses.

The programme is also designed with its feet firmly planted in our country while remaining accessible to the ideas originating overseas. The courses have ample room for not only students keen on specializing in the Indian economy, development economics and rural entrepreneurship but also for those eager in spreading their wings to international finance and international economics

In keeping with the latest trends in higher education, emphasis has been devoted to the ethical and equitable aspects of economics. Courses like gender and economics, strategies for sustainable development and economics of health and education aim to achieve this objective.

The BA (Honours) Programme in Economics offered by Mar Athanasius College (Autonomous), Kothamangalam is with Econometrics and Data Analysis as specialisation. This course is designed to equip students with a deeper understanding of advanced econometric techniques used in empirical economic analysis. Building upon foundational econometric concepts, this course focuses on complex models and methodologies to analyze real world economic data.

I am indebted to Prof (Dr) K.P. Mani (Former Head, Department of Economics, Calicut University), Dr. Jenny K Alex (Head, Department of Economics, Newman college, Thodupuzha) and Shri. Shaimon Joseph (Assistant professor in Economics, Nirmala College, Muvattupuzha) for all the efforts taken to the preparation of the syllabus. I take this opportunity to specially thank Dr. Manju S. Nair (Professor in Economics, University of Kerala) and all my colleagues, Dr. Igy George, Dr. Sheeba Abraham, Dr. Puthuma Joy and Ms. Neethu Salam as members of Board of studies who, from the very beginning, coordinated all the activities leading to the successful culmination of the task. We hope that our collective hard work to upgrade the curriculum and syllabus will reward the best outcome for the student community.

Dr. Eldose A.M

Chairman

Board of Studies in Economics (UG)

**BOARD OF STUDIES IN ECONOMICS (UG)**

<b>NAME</b>	<b>DESIGNATION</b>
Dr. Eldose A.M (Chairman)	Assistant Professor and Head Department of Economics Mar Athanasius College (Autonomous), Kothamangalam
Prf.Dr. K.P. Mani (Expert)	Former Professor and Head, Department of Economics, University of Calicut. Currently, Professor, De Paul Institute of Science and Technology (Affiliated to Mahatma Gandhi University), Angamaly, Kerala. (UGC Emeritus Professor)
Dr. Jenny K. Alex (Expert)	Head, Department of Economics, Newman college Thodupuzha
Prf.Dr Manju S Nair (Expert nominated by the Vice Chancellor, MG University)	Professor, Department of Economics, University of Kerala Thiruvananthapuram
Shri. Shaimon Joseph (Meritorious Alumnus)	Assistant Professor, Dept. of Economics, Nirmala College Muvattupuzha
Dr. Igy George (Member)	Associate Professor, Dept. of Economics Mar Athanasius College, Kothamangalam
Dr. Sheeba Abraham (Member)	Assistant Professor, Dept. of Economics, Mar Athanasius College, Kothamangalam
Dr. Puthuma Joy (Member)	Assistant Professor, Dept. of Economics, Mar Athanasius College, Kothamangalam
Ms. Neethu Salam (Member)	Assistant Professor, Dept. of Economics, Mar Athanasius College, Kothamangalam

### **Programme Outcomes (PO)**

#### **PO 1: Critical thinking and Analytical reasoning**

Capability to analyse and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories to develop knowledge and understanding; critical sensibility to lived experiences, with self-awareness and reflexivity of both self and society.

**PO 2: Scientific reasoning and Problem solving**

Ability to analyse, interpret and draw conclusions from quantitative/qualitative data; and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective; capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one's learning to real life situations.

**PO 3: Multidisciplinary/interdisciplinary/transdisciplinary Approach**

Acquire interdisciplinary /multidisciplinary/transdisciplinary knowledge base as a consequence of the learning they engage with their programme of study; develop a collaborative-multidisciplinary/interdisciplinary/transdisciplinary- approach for formulate constructive arguments and rational analysis for achieving common goals and objectives.

**PO 4: Communication Skills**

Ability to express thoughts and ideas effectively in writing and orally; Communicate with others using appropriate media; confidently share one's views and express herself/himself; demonstrate the ability to listen carefully, read and write analytically, and present complex information in a clear and concise manner to different groups.

**PO 5: Leadership and Entrepreneurship Skills**

Ability to work effectively and lead respectfully with diverse teams; setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision, and using management skills to guide people to the right destination, in a smooth and efficient way. After inculcating all the necessary graduate qualities, a graduate can become an entrepreneur.

**PO 6: Social Consciousness and Responsibility**

Ability to contemplate of the impact of research findings on conventional practices, and a clear understanding of responsibility towards societal needs and reaching the targets for attaining inclusive and sustainable development.

**PO 7: Equity, Inclusiveness and Sustainability**

Appreciate equity, inclusiveness and sustainability and diversity; acquire ethical and moral reasoning and values of unity, secularism and national integration to enable to act as dignified citizens; able to understand and appreciate diversity (caste, ethnicity, gender and marginalization), managing diversity and use of an inclusive approach to the extent possible.

**PO 8: Moral and Ethical Reasoning**

Ability to embrace moral/ethical values in conducting one's life, formulate a position/argument about an ethical issue from multiple perspectives, and use ethical practices in all work. Capable of demonstrating the ability to identify ethical issues related to one's work, avoid unethical behavior.

**PO 9: Networking and Collaboration**

Acquire skills to be able to collaborate and network with educational institutions, research organizations and industrial units in India and abroad.

**PO 10: Lifelong Learning**

Ability to acquire knowledge and skills, including "learning how to learn", that are necessary for participating in learning activities throughout life, through self-paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to changing trades and demands of work place through knowledge/skill development/reskilling.

**PROGRAM SPECIFIC OUTCOMES (PSO)**

On the completion of B.A. Economics programme (Honours), students should be able to demonstrate the programme specific outcomes listed below

PSO No		PO No.
PSO-1	Prepare themselves for employment and further study as economists	4,5,6,10
PSO-2	Analyze socio-economic phenomena using mathematical- quantitative- econometric- logical reasoning skills	1,2,3,9
PSO-3	Apply the theoretical knowledge and skills to analyze real life situations and focus on applied and policy issues in economics	1,2,6,7,8
PSO-4	Face the emerging economic challenges effectively with high standards of professionalism and ethics	1,2,4,5,8,9
PSO-5	Engage in multidisciplinary research	1,2,3,9
PSO-6	Review and design economic policies at regional and national levels	1,2,4,5,7,9

#### Essentials of Economics-I

	<p>Mar Athanasius College (Autonomous), Kothamangalam</p> <p>FYUGP SYLLABUS</p>
---	---

Programme	BA (Hons) Economics					
Course Name	Essentials of Economics-I					
Type of Course	Discipline Specific Component (DSC A&B)					
Course Code	M24EC1DSC100					
Course Level	100-199					
Course Summary	This course is designed to provide the learners with a comprehensive understanding of the fundamentals of Economics. By exploring the basic principles of economics, students will explore key concepts such as market mechanism, the role of government and the significance of trade. The course also aims at equipping the learners in viewing the real world scenarios and problems from the perspective of Economics.					
Semester	1				Credits	4

		45	0	30	0	75

#### Course Outcomes

CO No:	Expected Course Outcome	Learning Domains	PSO Nos
1	understand some of the basic concepts and principles of economics	U	2,3
2	understand how the market mechanism works	U	1,3,5
3	analyze the various types of elasticities and their economic implications.	An	2,3
4	evaluate the fundamental ways of government intervention in the market mechanism.	E	2,3,5

\*Remember (K), Understand (U), Apply (A), Analyze (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)

#### COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course description	Hours	CO No.
1		Fundamental Concepts	15	

	<b>1.1</b>	Definitions, nature, scope and significance of Economics – Microeconomics and Macroeconomics.	5	1
	<b>1.2</b>	Trade-off in Economics (including the discussion of efficiency and equity)-Rational decisions in Economics (Rational people think at margin).	5	1
	<b>1.3</b>	Model making in Economics and the problem of the real world –Positive and normative analysis, Difference in scientific judgement and values.	5	1
<b>2</b>		<b>Demand Analysis</b>	<b>20</b>	
	<b>2.1</b>	Concepts of demand- Demand function- types of demand: demand for Normal, Inferior, Substitute and complementary goods -factors effecting demand- Law of demand-demand schedule and demand curve – exceptions to the Law of Demand.	10	2
	<b>2.2</b>	Elasticity of demand- types- price, income and cross -degrees of price elasticity of demand- determinants of elasticity of demand.	5	2
	<b>2.3</b>	Measurement of Elasticity of demand: percentage method, total outlay, point and arc methods. Changes in Demand.	5	2
<b>3</b>		<b>Supply Analysis</b>	<b>20</b>	
	<b>3.1</b>	Concepts of supply- Supply function-types of supply: -factors affecting supply- Law of supply-supply schedule and supply curve – exceptions to the Law of Supply- Changes in supply.	10	4
	<b>3.2</b>	Types-degrees and measurement of elasticities of Supply - determinants of elasticity of supply.	10	1
	<b>3.3</b>	Production function – Short run and long run production function – Law of variable proportion – Laws of returns to scale.		
<b>4</b>		<b>Market mechanism and changes in market equilibrium</b>	<b>20</b>	

	<b>4.1</b>	Market Economy and invisible hand – Role of government	5	3
	<b>4.2</b>	Market equilibrium-changes in market equilibrium due to changes in demand and supply.	5	2
	<b>4.3</b>	Demand, Supply and Government Policies: Control on prices – Price ceiling –Price ceiling and market outcome	10	1
<b>Practicum</b>				
	<p>1.Discussion – on trade off among different economic goals like risk and return, efficiency and equity, development and environment etc.</p> <p>2.Discussion on topics like the Influence of Growing supermarkets in Kerala and closing down of petty shops on price rise and market control, technological adoption and labour displacement.</p> <p>3.Positive question: Is lack of skill set the reason for higher youth unemployment in India?</p> <p>4.Normative Question: Would student migration from Kerala benefit the state in the long run?</p> <p>5.Analyse demand for various categories of goods available in the market such as necessities and luxuries.</p> <p>6.Conduct a social survey related to consumer behaviour or a market survey to identify the most demanded vegetables/fruits in the nearby market.</p> <p>7. Create a compilation of goods categorized according to the degrees of competition</p> <p>8.Discussion – Practical difficulties of measuring national income in the context of own labour, housewife services etc.</p>			
	Teacher Specific Module			
<b>Teaching and Learning Approach</b>	<b>Classroom Procedure (Mode of transaction)</b>			
	<p>Classroom Lectures and Authentic Learning: Traditional lectures can provide solid factual knowledge</p> <p>Active-interactive learning, brainstorming, seminar, group activities: Foster student engagement through interactive class discussions</p>			

	<b>Suggested Course Delivery Methods</b>	
	o CD1 - Lecture by use of boards/LCD projectors/ Projectors etc.	
	o CD2 - Tutorials/Assignments	
	o CD3 - Class Seminars	
	o CD4 - Peer group Discussions	
<b>Assessment Types</b>	<b>MODE OF ASSESSMENT</b>	
	<b>A. Continuous Comprehensive Assessment (CCA) – 30 Marks</b>	
	<b>Particulars</b>	<b>Marks</b>
	Class Tests	15
	Assignments	5
	Seminar	5
	Project/Practicum/Quiz/Book Review/Fieldwork etc.	5
	<b>Total</b>	<b>30</b>

**B. Semester End examination**

<b>Descriptive type</b>	<b>Number of questions to be answered</b>	<b>Marks</b>
Short Answer	10 out of 12	10 x 2 = 20
Short Essay	6 out of 9	6x 5 = 30
Essays	2 out of 4	2 x 10 = 20
		Total 70 marks

	Mar Athanasius College (Autonomous), Kothamangalam FYUGP SYLLABUS
Programme	BA (Hons) Economics
Course Name	Economics and Finance in Everyday Life
Type of	MDC

Course							
Course Code	M241ECMDC100						
Course Level	100-199						
Course Summary	This course offers learners a concise yet comprehensive grasp of fundamental economic principles impacting their daily lives. Emphasizing critical thinking, the course enables learners to analyze economic events and policies, considering personal and societal implications. It prioritizes practical insights over theoretical depth, focusing on real-world applications to enhance students' understanding of economic dynamics in their everyday lives. Through this approach, students develop essential skills for navigating economic challenges and opportunities, equipping them with the knowledge to engage effectively in economic decision-making within their personal and broader societal contexts

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b>		
	<b>FYUGP SYLLABUS</b>		
Programme	BA (Hons) Economics		
Course Name	Micro Economics - I		
Type of Course	Discipline Specific Component (DSC A)		
Course Code	M24EC3DSC200		
Course Level	200-299		
Course Summary	This course provides essential tools for analyzing how scarcity influences decision-making, ranging from personal budgeting to corporate profit maximization. Explore the dynamic relationship between supply and demand, investigating the forces that determine prices and resource distribution. Through the examination of real-world examples such as market competition, government policies, and external factors, learners will enhance critical thinking and problem-solving abilities. This course empowers learners to make informed decisions as a citizen and effectively navigate economic challenges in their everyday lives.

**Navigating Surveys for Academic and Professional Success**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	Navigating Surveys for Academic and Professional Success					
Type of Course	DSE					
Course Code	M24EC3DSE202					
Course Level	200-299					
Course Summary	This lower-order thinking level (LOT) course covers types and methods of social science Inquiry, distinguishing between Description and Storytelling, Pure and Applied research, and various study approaches like Exploratory, Descriptive, and Historical studies. It delves into Surveys, detailing their meaning, characteristics, steps, and purposes, distinguishing Census from Sample surveys. The planning of Survey Studies is discussed, including study design elements such as objectives, hypothesis, and methodology. Sampling Techniques are explored, covering Population, Census, and Sampling methods. Tools for Data Collection, Data Processing, and Data Analysis are addressed, including the use of spreadsheets and various chart types. The syllabus concludes with insights into Report Writing, emphasizing its significance and outlining the steps involved.

**Digital Economy and Business Transformation**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	Digital Economy and Business Transformation					
Type of Course	DSC B					
Course Code	M24EC3DSC201					
Course Level	200-299					
Course Summary	<p>This Course is aimed to provide the basics of digital economics and promote digital entrepreneurship by empowering students with digital skills that helps them for starting own digital business. Through this core course, a first-hand information on digital business transformation avenues from the digital economy angle is to be delivered with an interdisciplinary approach. Familiarizing the application of the various digital economy tools for economic and business facilitation is to be done through different modes. The content in this course should be delivered from the use and application side rather than from technical development side. Economic conceptual integration of the topics with digital field is mandatory. Student should learn basic microeconomics and macroeconomics courses before attempting this course. The various tools mentioned in this course need not be purchased to provide the information; rather, a demonstration about their profile, features etc. with the help of the internet is sufficient. For giving a practical orientation of the topics, use of computer lab is highly desirable. .</p>

## Understanding Global Economy

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	Understanding Global Economy					
Type of Course	MDC					
Course Code	M24EC3MDC200					
Course Level	200-299					
Course Summary	It is designed to impart factual knowledge aligned with the Remember and Understand levels of Bloom's Taxonomy. The course aims to prepare learners for competitive exams, particularly the UPSC exams, providing them with the confidence to face such assessments. Moreover, it goes beyond rote memorization by emphasizing the development of skills such as leadership and communication. The incorporation of multidisciplinary, transdisciplinary, and interdisciplinary approaches suggests a broader educational perspective that fosters lifelong learning. Overall, it seems like a comprehensive and wellrounded program.

### Gender and Economics

**Mar Athanasius College (Autonomous), Kothamangalam**  
**FYUGP SYLLABUS**

Programme	BA (Hons) Economics					
Course Name	Gender and Economics					
Type of Course	VAC					
Course Code	M24EC3VAC200					
Course Level	200-299					
Course Summary	This course examines the intricate relationship between gender dynamics and economic structures, covering foundational concepts like gender equity and equality. It explores the interdisciplinary nature of Gender Economics, emphasizing its role in economic indices and women's contributions to GDP. This delves into global demographic changes and the evolving gender dynamics, particularly focusing on India and Kerala. Key gender issues in socioeconomic development, including the wage gap and disparities in various sectors, are addressed. The course concludes by examining gender policies at different levels and introducing the principles of gender budgets as tools for reducing disparities.

Discipline Specific Elective – DSE

**Introduction to Data Analysis for Economics**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b>					
<b>FYUGP SYLLABUS</b>						
Programme	BA (Hons) Economics					
Course Name	Introduction to Data Analysis for Economics					
Type of Course	Discipline Specific Elective – DSE					
Course Code	M24EC4DSE200					
Course Level	200-299					
Course Summary	This course is designed to provide students with fundamental data analysis skills in the field economic. Covering statistical methods and quantitative tools, it emphasizes hands-on applications such as data exploration, visualization, and interpretation. Students will learn to model economic trends, make predictions, and extract meaningful insights from datasets. The course equips them to contribute effectively to economic decision-making, market research, and policy formulation in an increasingly data-centric environment.					
Semester	4	Credits				4

**Course Outcomes**

CO No:	Expected Course Outcome	Learning Domains	PSO No:
	Upon completion of this course, students will be able		

	<b>to;</b>		
<b>1</b>	Understand the fundamentals of spread-sheet packages for data analysis.	U	1,2,3
<b>2</b>	Apply data analysis tools to simple problems in economics.	AE	3,4
<b>3</b>	Analyse data using the basic techniques learnt.	E, An	1,3,4
<b>4</b>	Create simple models for economic analysis.	An, C, Ap	1,4,5

\*Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)

### COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course Description	Hours	CO.NO
<b>1</b>		<b>Introduction to spreadsheets</b>	<b>15</b>	
	<b>1.1</b>	Introducing spreadsheets as a tool for data analysis	5	1
	<b>1.2</b>	Terminology and navigation - entering data - basic operations, operators and functions	5	5
	<b>1.3</b>	Creating and using named cells - working with multiple sheets- avoiding errors, data types and basic treatments	5	3
<b>2</b>		<b>Handling, charting and simple modelling using data</b>	<b>20</b>	
	<b>2.1</b>	Data sorting, filtering and parsing	5	5
	<b>2.2</b>	Data charting : xy scatter plot-secondary axis, column and bar charts, pie-chart, legends and titles	5	4
	<b>2.3</b>	Modelling: Symbols, expressions and simple models, creating general algebraic models-simple functions in economics, logical tests-linear functions involving logical tests	10	2
<b>3</b>		<b>Collating and describing data</b>	<b>20</b>	
	<b>3.1</b>	Collating and categorizing : Frequency	5	1

		distribution, cumulative frequency distribution(discrete and continuous) - selecting class interval, categorizing data, Pivot tables		
	<b>3.2</b>	Central tendency: mean, median, mode and weighted averages	5	3
	<b>3.3</b>	Dispersion : range, standard deviation, variance, inter quartile range, coefficient of variation	5	1
	<b>3.4</b>	Calculating the mean, standard deviation and variance from frequency distributions	5	3
<b>4</b>		<b>Correlation, regression and financial arithmetic</b>	<b>20</b>	
	<b>4.1</b>	Correlation analysis: Pearson's correlation coefficient	3	
	<b>4.2</b>	Regression analysis: Simple linear regression- non-linear regression	4	2
	<b>4.3</b>	Addins : using Data Analysis Routine for calculating mean, standard deviation and variance of variables – correlation and regression coefficients.	7	5
	<b>4.4</b>	Financial Arithmetic : simple interest, compound interest, fractional years, variations in the compounding period, continuous compounding, growth rate calculations, annuities, debt repayments, Net Present Value and Internal Rate of Return	6	4
	<b>Practicum</b>	<ol style="list-style-type: none"> <li>1. Navigation and basic operations</li> <li>2. Using the inbuilt functions on datasets</li> <li>3. Using filters to answer specific questions on datasets</li> <li>4. Plotting data using different charts</li> </ol>		

		<p>5. Using conditional tests and lookup functions on datasets</p> <p>6. Using pivot tables on data</p> <p>7. Using measures of central tendency and dispersion on datasets</p> <p>8. Using functions to find correlation coefficient and regression coefficients</p> <p>9. Using Analysis tool pack for creating correlation matrix and regression tables</p> <p>Creating financial arithmetic calculators</p>
<b>5</b>	<b>Teacher Specific Module</b>

**Financial Risk Analysis**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	Financial Risk Analysis					
Type of Course	Discipline Specific Elective – DSE					
Course Code	24EC4DSE201					
Course Level	200-299					
Course Summary	This course is designed to provide basic knowledge about financial risk analysis for different types of entities. The primary objective is to facilitate basic knowledge in risk management at an entry level so that later, the students can make analytical exercises in a practical environment. Since risk analysis has crucial applications in enterprise management, especially banks and NBFCs, this paper tries to provide area specific knowledge so that they can acquire the skill from various risk analysis tools for their further studies.

Content for Classroom transaction (Units)

Module	Units	Course Description	Hours	CO.NO
<b>1</b>		<b>Introduction to Risk Analysis</b>	<b>15</b>	
	<b>1.1</b>	Understanding Risk: Definition and Types - importance of Risk Management in Finance Components of financial risk-Need for macroeconomic risk analysis and macro financial risk analysis.	5	1
	<b>1.2</b>	Credit risk assessment-Counter party risk in the financial sector-Hedging-Balancing risk	3	5
	<b>1.3</b>	Foreign exchange risk, commodity price risk and interest rate risk: Meaning and measurement.	2	2
	<b>1.4</b>	Technological change and risk in the era of digitalization/automation- Technological obsolescence-Need for technological	5	1
<b>2</b>		<b>Financial Economics and Risk Analysis</b>	<b>20</b>	
	<b>2.1</b>	Different statistical risk analysis tools for financial institutions, corporate and digital enterprises (overview only).	5	3
	<b>2.2</b>	Time Value of Money: Future Value, Present Value, Valuation of annuities and perpetuities-NPV, IRR using spreadsheet like excel-Importance of forecasting and budgeting models for risk analysis Scenario analysis for future risk situations.	5	1
	<b>2.3</b>	Value At Risk (VaR) and Conditional Value at Risk (CvaR)	5	1
	<b>2.4</b>	Monte Carlo Simulations (introductory level)	5	4

		- Decision Tree Analysis-Sensitivity Analysis-Failure Mode and Effect Analysis (FMEA).		
<b>3</b>		<b>Financial Risk Analysis</b>	<b>20</b>	
	<b>3.1</b>	The conceptual components regarding the operational environment of a financial entity-Balance sheet-Assets and liabilities-Importance of liquidity-NPAs-CRAR-Return on Assets-CD Ratio-leverage.	5	1
	<b>3.2</b>	Financial Risk Analysis: Market Risk, Credit Risk, Operational and Liquidity Risk-Case Studies of Financial Stability Risks- (eg: SVB, Yes Bank, Northern Rock).	5	6
	<b>3.3</b>	Liquidity Risk -Importance of liquidity risk for banks -Managing liquidity risk-Measuring liquidity risk: liquidity ratio.	5	3
	<b>3.4</b>	RBI's Regulatory and Supervisory frameworks in India regarding risk management: Risk weights-Risk based supervision (SPARC).	5	4
<b>4</b>		<b>Corporate Risk Analysis</b>	<b>20</b>	
	<b>4.1</b>	Corporate balance sheet components and their significance in risk assessment.	5	3
	<b>4.2</b>	Corporate Risk: Strategic Risk, Innovation and Technology adaptation Risk, Operational Risk, Financial Risk and Project Risk.	5	3
	<b>4.3</b>	Cyber security Risks, Supply Chain Risks-Insurance as a mechanism for risk mitigation.	5	5
	<b>4.4</b>	Key Risk Indicators (KRIs)-Key Performance Indicators (KPIs)-Significance of Corporate Governance.	5	6

	<b>Practicum</b>	<ol style="list-style-type: none"> <li>1. Map out the various macroeconomic or macro financial risk factors affecting financial sector entities.</li> <li>2. Illustrate the significance of commodity price risk for industrial sector firms.</li> <li>3. Outline the various technological change risks emanating from technological disruptions including AI.</li> <li>4. Frame decision tree analysis related to a financial or corporate decision.</li> <li>5. Conduct a model risk analysis using @risk.</li> <li>6. Attend an online course/class on bloomberg terminal or Monte Carlo Simulations and write a report containing step by step procedure for the analysis.</li> <li>7. Chart out the various regulatory and supervisory norms by the RBI for Financial entities in India.</li> <li>8. Outline the significance of liquidity risk and operational risk related to banks and NBFCs based on the recent financial sector occurrences.</li> <li>9. Illustrate the principle behind risk based supervision.</li> <li>10. Prepare a mind map analysis of the various corporate risk factors.</li> </ol>

Content for Classroom transaction (Units)

Module	Units	Course Description	Hours	CO.NO
<b>1</b>		<b>Overview of the Fintech Sector</b>	<b>15</b>	
	<b>1.1</b>	Introduction to Financial Technologies or Fintechs: Definition, evolution, and importance-Traditional versus digital finance-India as an emerging power in fintech-Trends in Indian Fintech sector: payments, lending, insurance, etc.	5	1
	<b>1.2</b>	Fintech supporting infrastructure in India: Digital Public Infrastructure (DPI) in India and its supportive effect on fintech industry-India Stack-ONDC-RBI Innovation Hub	5	6
	<b>1.3</b>	Technological base of fintech entrepreneurship: Use of various technologies including AI in different areas of financial services like client onboarding, loan disbursement, recovery and customer interfaces-Robo advisors in wealth management services-Platforms and practices that support fintech in India: Aadhar verification, KYC norms, Video KYC, Payment Infrastructure, CIBIL Score, CIBIL Microfinance score	5	4
<b>2</b>		<b>India's Financial Services Industry -a Fintech angle Overview</b>	<b>20</b>	
	<b>2.1</b>	Overview of the Indian financial services industry-Banks and NBFCs-MFIs, Payment banks and Small Finance Banks- Peer-to-Peer (P2P) Lending Platforms-Loan appsAccount Aggregators and other Fintech entities	10	3
	<b>2.2</b>	Overview of the Fintech industry in India-Leading categories (payments, lending tech, insure tech, neo banks, fintech Saas etc.) - Banks adopting financial technologies-	5	2

		Fintech firms as financial sector disruptors.		
	<b>2.3</b>	Ideation of a fintech firm: Need for a user centric approach – Business model canvas and value proposition design Revenue models: subscription, transaction fees etc Technological tool kits for Fintech enterprise.	5	6
<b>3</b>		<b>Electronic Money-Cryptocurrencies and Blockchain Technology</b>	<b>20</b>	
	<b>3.1</b>	Electronic Money and Cryptocurrencies- CBDC-Types of cryptocurrencies/assets- Difficulties in regulating cryptocurrencies- Global attempts to regulate crypto assets.	10	4
	<b>3.2</b>	Crypto currencies: Currency vs asset nature- Risks of cryptocurrencies-Crypto Exchanges- Crypto crisis in the recent past.	5	3
	<b>3.3</b>	Blockchain technology-Applications of blockchain technology in the financial sector.	5	1
<b>4</b>		<b>Regulatory landscape for fintech in India</b>	<b>20</b>	
	<b>4.1</b>	Regulatory Framework for Fintech industry: RBI Guidelines and Regulations-Fintech Repository.	10	3
	<b>4.2</b>	Role of Self-Regulatory Organisations (SRO) in the fintech landscape-Financial stability and the fintech industry.	5	6
	<b>4.4</b>	Evolution of India's digital payment ecosystem Components of Digital payment ecosystem in India - Uniqueness of UPI- Internationalisation of UPI Comparison of UPI with other major digital payments systems across the world.	5	2

	<b>Practicum</b>	<ol style="list-style-type: none"> <li>1. Map out the various components of DPI in India and demonstrate how they helped and supported the birth and rapid proliferation of fintech for financial institutions and the fintech firms.</li> <li>2. Illustrate the operational aspects of CIBIL score.</li> <li>3. Map the different types of fintech enterprises operating in India.</li> <li>4. Explore and demonstrate the interdependence between banks, NBFCs and fintech firms in the Indian context.</li> <li>5. Give ideation and provide a suitable business model for a potential fintech startup.</li> <li>6. Classify the different types of crypto assets.</li> <li>7. Compare and contrast crypto assets with CBDC.</li> <li>8. Analyse the failure of FTX and the message it left to the financial regulators.</li> <li>9. Discuss the need for drawing a balance between regulation and innovation support of fintechs.</li> <li>10. Elaborate the unique advantages of UPI as a rockstar in the global fintech arena</li> </ol>

**Skill Enhancement Course (SEC)**  
**Economics of Rural Entrepreneurship**

**Mar Athanasius College (Autonomous), Kothamangalam**  
**FYUGP SYLLABUS**

Programme	BA (Hons) Economics					
Course Name	Economics of Rural Entrepreneurship					
Type of Course	Skill Enhancement Course (SEC)					
Course Code	M24EC4SEC200					
Course Level	200-299					
Course Summary	<p>This course provides a positive insight for students towards Rural Entrepreneurship and the ample opportunities it provides for the students to contribute towards the economic growth of the Nation. It aims to convert the dynamic Indian rural entrepreneurship as the haven for wealth creation. Rural entrepreneurship is considered to be a panacea to significant rural dilemmas like employment, impoverishment, and migration. Entrepreneurship is a prudent approach in favor of livelihood opportunities in rural areas while improving overall income levels. So rural entrepreneurship must be seen as a move toward national development. Moreover, rural start-ups are capable of providing the route to woman empowerment from her disenchantment.</p>

### COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course Description	Hours	CO.NO
1		<b>Entrepreneurship - concepts and Theories</b>	<b>15</b>	
	1.1	Concepts: Entrepreneurship- entrepreneur- Importance of Entrepreneurship – Evolution of entrepreneurship in rural India-Types of rural entrepreneurship- Qualities and functions of an entrepreneur— Factors, Problems and Challenges of Rural Entrepreneurship	5	1
	1.2	Entrepreneurial competencies - entrepreneurial motivating factors-Women entrepreneurship- Ecopreneurship - rural micro enterprises	5	1
	1.3	Theories of Entrepreneurship: Innovation Entrepreneurship theory - Economic Entrepreneurship theory- Sociological Entrepreneurship theory Psychological Entrepreneurship theory.	5	4
2		Rural Entrepreneurial Ecosystem, Business	15	

		Planning and Agribusiness		
	<b>2.1</b>	Institutional Support for Rural Entrepreneurship - Special Role of NABARD in promoting and supporting the Rural Entrepreneurship - Government Schemes for promotion of Rural Entrepreneurship (central, state and district level schemes)- Rules and Procedures to start a Rural Entrepreneurship Firm. Procedures to obtain formal loans from banks and other institutions - Preparation of Detailed Project Report for Loan	10	1
	<b>2.2</b>	Agribusiness and Value Addition: Procuring – Processing Storing- Marketing of Rural Products: Market Survey, Marketing Strategies- Branding- Labelling of products - concepts only (FASSI, ISI, ISO, FAO), Planning and Promotion, Digital and Social Media Marketing	5	1
<b>3</b>		<b>Rural Entrepreneurship Opportunities</b>	<b>15</b>	
	<b>3.1</b>	New Entrepreneurship Opportunities in Farm sector: Organic Farm Products, Horticultural Products, Forest Produce, Medicinal Plant Products	10	3
	<b>3.2</b>	Entrepreneurship Opportunities in Rural Non - farm sector: Poultry, Aquaculture, Sericulture, Honeybee, Mushroom Cultivation, Handicrafts.	5	4
<b>5</b>	Teacher Specific Modules			
<b>Teaching and Learning Approach</b>	<b>Classroom Procedure (Mode of transaction)</b> Classroom Lectures and Authentic Learning: Traditional lectures can provide solid factual knowledge Active-interactive learning, brainstorming, seminar, group activities: Foster student engagement through interactive class discussions Suggested Course Delivery Methods o CD1 - Lecture by use of boards/LCD projectors/ Projectors etc. o CD2 - Tutorials/Assignments			

	o CD3 - Class Seminars o CD4 - Peer group Discussions

**Sustainable Development Strategies and Governance**

	<b>Mar Athanasius College (Autonomous), Kothamangalam FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	Sustainable Development Strategies and Governance					
Type of Course	VAC					
Course Code	M24EC4VAC200					
Course Level	200-299					
Course Summary	This undergraduate course empowers the learner, to navigate towards a more sustainable future. Explore the interconnectedness of social, economic, and environmental issues through the lens of the UN's Sustainable Development Goals (SDGs). Engage in critical discussions about governance frameworks, and stakeholder participation in driving positive change. Develop analytical, problem-solving, and communication skills to contribute effectively to a just and sustainable world. This course is for degree students across disciplines, equipping learners with the knowledge and tools to become an agent of sustainable development.

### COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course Description	Hours	CO.NO
1		<b>Introduction to Sustainable Development</b>	<b>15</b>	
	1.1	Broad Introduction to Sustainable Development: Context – importance – impact – implications – definition of Sustainable Development.	5	3
	1.2	Sustainable Development Debates: UN Conference on the Human Environment (1972) - World Commission on Environment and Development (1987) - United Nations Conference on Environment and Development (1992) -General Assembly Special Session on the Environment (1997) - World Summit on Sustainable Development (2002) - UN Conference on Sustainable Development (2012) - UN Sustainable Development Summit (2015) - UN Framework Convention on Climate Change: 21st Conference of Parties (COP21) (2015) - Global Warming of 1.5 °C:	5	1

		IPCC Special Report (2018) - UN Climate Action Summit (2019) - IPCC Reports for Assessment Report-6 (refer <a href="https://research.un.org/en/docs/environment/conferences">https://research.un.org/en/docs/environment/conferences</a> )		
	<b>1.3</b>	Sustainable Development Perspectives: MDGs and SDGs – Evaluation of MDGs and SDGs over the years.	5	4
<b>2</b>		<b>Ecosystem &amp; Sustainability</b>	<b>15</b>	
	<b>2.1</b>	Fundamentals of ecology - types of ecosystems & and interrelationships, factors influencing sustainability of ecosystems, ecosystem restoration - developmental needs.	5	1
	<b>2.2</b>	Introduction to sustainability and its factors, requirements for sustainability: food security and agriculture, renewable resources - water and energy, non-renewable resources, factors and trade-offs, sustainability conflicts, a conceptual framework for linking sustainability and sustainable development.	5	2
	<b>2.3</b>	Overview on Analytical Framework for Sustainability Studies [Pressure-State-Response (PSR) Framework - DPSIR Framework (Drivers-Pressure-State-Impact Response)- Sustainability Assessment Framework - Resilience Framework - Planetary Boundaries Framework - Ecological Footprint Analysis – Social Ecological Systems (SES) Framework (Overview only)]	<b>5</b>	4
<b>3</b>		<b>Community Resilience and Governance</b>	<b>15</b>	
	<b>3.1</b>	Community resilience - definition – resilience: types causes; Social Equity and Justice in Community Resilience – Food security – shelter – health care.	5	1

	<b>3.2</b>	Community-Based Approaches to Disaster Preparedness and Response – Basic terms: Crisis, Emergency, Hazards, Disaster, and Catastrophe - environmental policy instruments: “command and control” instruments-market-based instruments informational/educational instruments, and voluntary agreements (Overview only)	5	5
	<b>3.3</b>	Principles of Effective Governance for Sustainable Development – Effectiveness (Competence, Sound policy-making, collaboration); Accountability (Integrity, Transparency, Independent oversight); Inclusiveness (Leaving no one behind, no discrimination, participation, subsidiarity, intergenerational equity) - Legal Frameworks for Environmental Protection: General, Water, Air, Wildlife and Forest (Indian Context)	5	6

### COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course Description	Hours	CO.NO
<b>1</b>		<b>An Introduction to Econometrics</b>	<b>20</b>	
	<b>1.1</b>	Meaning, Nature, Scope and Goals -Basic Concepts	4	1
	<b>1.2</b>	Types of Data: Time Series-Cross-section – Pooled, Panel, Engineering data	8	1
	<b>1.3</b>	Steps in Econometric Methodology -Error Term and its significance – Dummy variables – instrumental variables (concept only)	8	4
<b>2</b>		<b>Module -II –Linear Models</b>	<b>15</b>	
	<b>2.1</b>	Simple Regression-PRF-SRF—Theory of estimation (Ordinary Least Squares only) Sampling distribution-Point vs. Interval Estimation-Standard Error	5	3
	<b>2.2</b>	Assumptions and numerical properties of CLRM	2	1
	<b>2.3</b>	Gauss Markov Theorem and BLUE (without proof)	4	5

	<b>2.4</b>	Goodness of fit -Coefficient of determination (partial regression coefficient $r^2$ )	4	2
<b>3</b>		<b>Basics of hypothesis testing and Violation of the Assumptions of Classical Model</b>	<b>20</b>	
	<b>3.1</b>	Test of hypothesis– Types - Procedure - Critical Region-Type I and Type II Errors- Level of Significance -Power of a test	10	6
	<b>3.2</b>	Nature, Consequences, detection test and remedial measures : Heteroscedasticity, Multicollinearity and Autocorrelation ( mention any three important tests for each problem and also three remedies )	10	1
<b>4</b>		<b>Classical model – Extensions</b>	<b>20</b>	
	<b>4.1</b>	Model Specification and Errors: Consequences—Under fitting and Over fitting- Measurement Errors	10	6
	<b>4.2</b>	Different Functional Forms of Regression Models and their Applications (Log-linear, Semi- log, Double log, Reciprocal and Log Reciprocal Models).	10	4
	<b>Practicum</b>	Identify various data sets and gain practical experience working with various data structures commonly used in data analysis. This will help to develop skills in data acquisition, and analysis techniques appropriate for each data type. And also understand the strengths and limitations of different data structures for addressing specific research questions. Familiarize with, SRF, PRF and Regression equations Solve sample problems to understand testing of hypothesis Preparation of term paper -Defining the problem ,Use the econometric methodology Analysis –Necessary Tests

Discipline Specific Elective – DSE

**Data Analysis for Economics using Python**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b>					
	<b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	Data Analysis for Economics using Python					
Type of Course	Discipline Specific Elective – DSE					
Course Code	M24EC5DSE300					
Course Level	300-399					
Course Summary	This course is designed to provide students with fundamental data analysis skills in the field economics. Covering statistical methods and quantitative tools, it emphasizes hands-on applications such as data exploration, visualization, and interpretation. Students will learn to model economic trends, make predictions, and extract meaningful insights from datasets. The course equips them to contribute effectively to economic decision-making, market research, and policy formulation in an increasingly data-centric environment.

<b>Module</b>	<b>Units</b>	<b>Course description</b>	<b>Hours</b>	
<b>1</b>		<b>Introduction to programming for economic analysis</b>	<b>15</b>	
	<b>1.1</b>	Economics and Programming: Importance of programming in Economics- Introduction to Excel, SAS, SPSS, EViews, Gretl, Stata, R and Python Software.	5	1
	<b>1.2</b>	Introduction to Python : Setting Up the Python- installing Python- Uses of Integrated Development Environments IDLE, Jupyter, PyCharm , Spyder, Visual Studio Code and Atom.	5	1
	<b>1.3</b>	Economic variables in Python Syntax: Variable types, lists, tuples, sets, dictionaries.	3	4
	<b>1.4</b>	Basic computation and Structuring Objects: lists , tuple, sets, strings and dictionary methods.	2	3
<b>2</b>		<b>Python syntax and objects</b>	<b>15</b>	

	<b>2.1</b>	Control Flow statements in Python: Conditional Statements-IF , ELIF and ELSE , Iteration statements-for and while, Break statements.	5	3
	<b>2.2</b>	Python functions in Economics : Importance, Inbuilt functions-user defined functions- function rules.	3	4
	<b>2.3</b>	OOP in Python: Creating python objects-methods-building classes.	2	6
	<b>2.4</b>	Introduction to Libraries: NumPy, Pandas, Scipy, Scikit leran, stats models-Methods for importing modules.	5	1
<b>3</b>		<b>Quantitative Economics in Python</b>	<b>15</b>	
	<b>3.1</b>	Quantitative Economics using Python I: Linear Algebra vectors-matrices-Linear equations-Eigen vectors ad Eigen value.	5	4
	<b>3.2</b>	Economic Data visualization in Python: Introduction to visualization libraries-matplotlib- Bar graph, Line graph , Scatter plot, pie chart.	5	3
	<b>3.3</b>	Quantitative Economics using Python II: Introduction to Probability-mean-variance- Data distributions-use of random module.	3	4
	<b>3.4</b>	Drawing Economic graphs using Python- Demand and Supply Curves-Costs Curves-other curves.	2	3
<b>4</b>		<b>Data Handling</b>	<b>15</b>	
	<b>4.1</b>	Data and Python: Data extraction - Different Data file formats- CSV, Doc , text and PDF file extraction.	5	1
	<b>4.2</b>	Data Handling in Python: Data cleaning approaches - qualitative and quantitative- Introduction to Database management systems.	3	4

	<b>4.3</b>	Working with Pandas Data Frame: Exploring Data- count, binning, minimum, maximum, mean, variance and sd Inclusion and Exclusion of Columns.	5	3
	<b>4.4</b>	Modelling in Python- Libraries for Regression – Implementing Economic Models-Growth Models.	2	2
<b>5</b>	<b>Teacher Specific Modules</b>			
<b>Teaching and Learning Approach</b>	<p><b>Classroom Procedure (Mode of transaction)</b></p> <p>Classroom Lectures and Authentic Learning: Traditional lectures can provide solid factual knowledge Active-interactive learning, brainstorming, seminar, group activities: Foster student engagement through interactive class discussions</p> <p>Suggested Course Delivery Methods</p> <ul style="list-style-type: none"> <li>o CD1 - Lecture by use of boards/LCD projectors/ Projectors etc.</li> <li>o CD2 - Tutorials/Assignments</li> <li>o CD3 - Class Seminars</li> <li>o CD4 - Peer group Discussions</li> </ul>

**Public Economics-I**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	Public Economics-I					
Type of Course	Discipline Specific Elective – DSE					
Course Code	M24EC5DSE301					
Course Level	300-399					
Course Summary	Public economics is an academic discipline that examines government policy through the lenses of economic efficiency and equality. This study examines the characteristics of government involvement and its consequences on the allocation, distribution, and stabilization aspects. This subject inherently entails a rigorous investigation of government revenue and expenditures and institutions behind it.

**Discipline Specific Elective – DSE**  
**Financial Regulation and supervision**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	Financial Regulation and supervision					
Type of	Discipline Specific Elective – DSE					
Course Code	M24EC5DSE303					
Course Level	300 -399					
Course Summary	<p>This course provides an in-depth look at the financial regulatory and supervisory landscape, both in India and globally. The primary goal is to help students grasp various concepts, ideas, and issues pertinent to financial regulation and focuses more on banking sector and NBFC regulation. Understanding regulation and supervision—key mechanisms governing financial institutions—is crucial for effective microeconomic management of these entities. This course emphasizes conceptual understanding and is structured to offer a detailed exploration of these foundational elements, given its undergraduate level, and hence deliberately excludes debates and secondary developments to focus more on conceptual foundations.</p>

**Discipline Specific Elective – DSE**  
**Actuarial Science and Risk Management in Insurance**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	Actuarial Science and Risk Management in Insurance					
Type of Course	DSE					
Course Code	M24EC5DSE304					
Course Level	300-399					
Course Summary	<p>This comprehensive course covers foundational concepts in actuarial science, economic principles of insurance, risk management strategies, and organizational aspects of insurance product development and claim assessment. Students will learn about mortality tables, actuarial valuation techniques, financial underwriting, and micro-insurance regulations, providing a solid understanding of the insurance industry's core practices. Additionally, the course delves into risk theory, risk management processes, marketing strategies for insurance products, and the construction of claim development triangles to assess ultimate claims. Practical components include case studies, simulations, and group projects to apply theoretical knowledge and develop practical skills essential for careers in actuarial science, insurance, and risk management. By the end of this course, students will be equipped with a comprehensive understanding of insurance operations and prepared to tackle real-world challenges in the industry.</p>

**Discipline Specific Elective – DSE  
Business Economics**

	<b>Mar Athanasius College (Autonomous), Kothamangalam FYUGP SYLLABUS</b>
Programme	BA (Hons) Economics
Course Name	Business Economics

Type of Course	DSE					
Course Code	M24EC5DSE305					
Course Level	300-399					
Course Summary	This course on Business Economics helps the students to comprehend the concepts of Economics to aid managerial decision making. The course equips students to apply demand forecasting techniques in various market conditions, delineate the features of production and cost curves in the short-term and long term perspective and decipher pricing strategies and various profit types and theories in small and large organisations.

### Discipline Specific Elective – DSE

### Economics of Innovation and Entrepreneurship

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>
Programme	BA (Hons) Economics
Course Name	Economics of Innovation and Entrepreneurship
Type of	Discipline Specific Elective (DSE)
Course Code	M24EC5DSE306
Course Level	300 -399
Course	This course provides a comprehensive understanding of Innovation,

Summary	Entrepreneurship and practical application of the innovation process equipping students with the knowledge and skill needed to navigate the dynamic business landscape. The course begins with an exploration of innovation, where students analyze the current business landscape and recognize the significance of innovation, including its diverse types and specific needs within India. Intellectual Property Rights (IPR) are addressed in detail, focusing on their crucial role in protecting innovative ideas through patents and copyrights. It also equips students with knowledge of both traditional and contemporary financing options, ensuring a comprehensive understanding of financial mechanisms crucial for entrepreneurial ventures. The Introduction to Entrepreneurship module cultivates an entrepreneurial mindset, introduces startup concepts, and explores different forms of ownership. The practical Application of the Innovation Process is emphasized through critical thinking, ideation, and hands-on experiences like field visits to startup units, enabling students to develop valuable skills for navigating the dynamic business

### COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course Description	Hours	
1		<b>Introduction to International Trade Theories</b>	<b>15</b>	
	1.1	International Economics: Nature and scope-Basis of Trade-Trade as an Engine of growth.	5	2

	<b>1.2</b>	Opportunity Cost curve, Offer Curves (concepts only)- Terms of Trade: types	5	5
	<b>1.3</b>	Key approaches and theories: Mercantilism, Absolute Advantage and Comparative Advantage Models, Heckscher - Ohlin theory, Factor Price Equalisation theorem, Leontief's paradox- Gains from Trade.	5	3
<b>2</b>		<b>Balance of Payments</b>	<b>15</b>	
	<b>2.1</b>	BOP - Meaning and structure – current account and capital account – equilibrium and disequilibrium	5	3
	<b>2.2</b>	Measures to correct Balance of Payment disequilibrium: Monetary and Non-Monetary Measures - Elasticity Approach- Marshall- Learner condition.	10	5
<b>3</b>		<b>Exchange Rate and Foreign Exchange Market</b>	<b>15</b>	
	<b>3.1</b>	Theories of exchange rate determination: Mint Parity Theory, Purchasing Power Parity theory, balance of payment theory- Fixed and Flexible exchange rate systems - Exchange rate system in India	5	2
	<b>3.2</b>	Foreign exchange markets: Functions, Participants Determination of equilibrium exchange rate	5	5
	<b>3.3</b>	Types of foreign exchange transactions: spot and forward rates, hedging, speculation, arbitrage, futures, options and currency swaps (concepts only).	5	3
<b>4</b>		<b>Trade Mechanisms and International Economic Institutions</b>	<b>15</b>	
	<b>4.1</b>	Commercial Policy – Free trade and Protection Tariff, Quota and their effects, non-tariff barriers	5	5

	<b>4.2</b>	Economic Integration: Meaning, types and benefits Prominent Trade Blocs: European Union, RCEP and ASEAN (overview only)- International Institutions: IMF, World Bank and WTO (Objectives and functions).	5	3
	<b>4.3</b>	Current Trade Problems and Challenges – Deglobalization-De-dollarization - Decoupling - Trade Wars- Migration and its economic impact - Global value chains.	5	1
<b>5</b>		Teacher Specific Module		
<b>Teaching and Learning Approach</b>	<p><b>Classroom Procedure (Mode of transaction)</b> Classroom Lectures and Authentic Learning: Traditional lectures can provide solid factual knowledge Active-interactive learning, brainstorming, seminar, group activities: Foster student engagement through interactive class discussions</p> <p><b>Suggested Course Delivery Methods</b></p> <ul style="list-style-type: none"> <li>o CD1 - Lecture by use of boards/LCD projectors/ Projectors etc.</li> <li>o CD2 - Tutorials/Assignments</li> <li>o CD3 - Class Seminars</li> <li>o CD4 - Peer group Discussions</li> </ul>			
<b>Assessment Types</b>	<p><b>MODE OF ASSESSMENT</b></p> <p><b>A. Continuous Comprehensive Assessment (CCA) – 30 Marks</b></p>			
	<b>Particulars</b>	<b>Marks</b>		
	Class Tests	15		
	Assignments	5		
	Seminar	5		
	Project/Practicum/Quiz/Book Review/Fieldwork etc.	5		
	<b>Total</b>	<b>30</b>		

**B. Semester End examination**

Descriptive type	Number of questions to be answered	Marks
Short Answer	10 out of 12	10 x 2 = 20

Short Essay	6 out of 9	6x 5 = 30
Essays	2 out of 4	2 x 10 = 20
		Total 70 marks

**Mathematics for Economic Analysis**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	Mathematics for Economic Analysis					
Type of Course	Discipline Specific Component - DSC					
Course Code	M24ST6DSC303					
Course Level	300 -399					
Course Summary	Provide students with a strong foundation in mathematical modelling and its applications in economic analysis.					
Semester	6				Credits	4
Course Details	Learning Approach	Lecture	Tutorial	Practicum	Others	Total Hours
		45	0	30	0	75

**Course Outcomes**

CO No:	Expected Course Outcome Upon completion of this course, the students will be able to:	Learning Domains	PSO No:
1	Provide students with a strong foundation in mathematical modelling and its applications in economic analysis.	U	1,4
2	Develop quantitative way approach in solving economic situations using matrix algebra.	A	1,5

3	Develop mathematical models for future predictions using differentiation.	A	1,2,5
4	Understand how the economic theory can be zipped using mathematical tools in differential calculus	U	2,5,6

\*Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)

### COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course Description	Hours	CO.NO
<b>1</b>		<b>Basic Economic Functions</b>	<b>15</b>	
	<b>1.1</b>	Constants, parameters and Variables	5	1
	<b>1.2</b>	Sets and Functions, Types of Functions- Linear & Non- Linear (Quadratic, Logarithmic and Exponential)	10	4
<b>2</b>		<b>Theory of Matrices</b>	<b>20</b>	
	<b>2.1</b>	Concept and types of Matrices, Matrix Operation- Addition, subtraction, multiplication (up to 3x3)- Determinants (up to order 3x 3), Properties of determinants.	10	2
	<b>2.2</b>	Adjoint and inverse of Matrix, Matrix formulation of a problem, Matrix formulation a system of equations	5	4
	<b>2.3</b>	Solution to linear equations, Cramer 's rule and its applications, Uses of Matrices in Economics.	5	5
<b>3</b>		<b>Differential Calculus</b>	<b>20</b>	
	<b>3.1</b>	Meaning and definition of differentiation, Rules of Differentiation, differentiation of an implicit function, Derivative of Logarithmic and Exponential Functions.	10	1

	<b>3.2</b>	Differentiation of an implicit function, Partial Derivatives and Rules of Partial Differentiation, Higher-order Partial Derivatives	5	1
	<b>3.3</b>	Increasing and decreasing functions, Maxima and Minima of Functions.	5	4
<b>4</b>		<b>Applications of Differential Calculus</b>	<b>20</b>	
	<b>4.1</b>	Marginal utility, Marginal propensity to Consume, Marginal Cost, Marginal Revenue	5	1
	<b>4.2</b>	Relationship between Average Revenue and Marginal Revenue-Relationship between Average Cost and Marginal Cost - Elasticity: Price elasticity	5	4
	<b>4.3</b>	Maxima and Minima of functions. Economic applications: Utility Maximization, Cost Minimization, Profit Maximization.	10	2
	<b>Practicum:</b>	1. Problems based on sets and functions. 2. Problems based on matrices and determinants. 3. Problems based on differentiation, partial differentiation and maxima and minima of functions. 4. Problems based on applications of derivatives.		
<b>5</b>		Teacher Specific Module		
<b>Teaching and Learning Approach</b>	<b>Classroom Procedure (Mode of transaction)</b> Classroom Lectures and Authentic Learning: Traditional lectures can provide solid factual knowledge Active-interactive learning, brainstorming, seminar, group activities: Foster student engagement through interactive class discussions

### COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course Description	Hours	CO.NO
1		<b>Review of Multiple Regression Analysis</b>	<b>20</b>	
	1.1	Multiple Regression-Assumptions— Estimation Procedure - General k variable Model—Variance Covariance Matrix	5	1
	1.2	Multiple Coefficient of Determination-R Square and Adjusted R Square	5	4
	1.3	Estimation and Testing of Hypothesis-Test of Coefficients and Overall Significance- -Z and t and F test- P-value—Testing the Equality of Two Regression Coefficients	5	6
	1.4	Restricted Least Squares-Testing Linear Equality Restrictions (Concepts Only) Non-parametric and Semi-parametric Models (Discuss any two important tests)	5	3
2		<b>Regression with Qualitative Variables and Simultaneous</b>	<b>20</b>	
	2.1	Qualitative Explanatory Variables— Dummy Variable Regression—ANOVA and ANCOVA Models—Dummy variable Trap—interpretation of Regression results- Models with Qualitative Dependent Variables- LPM, Logit, Probit, and Tobit Models	10	2

		Different forms - linear, double log, lin log, log lin		
	2.2	Interpretation of Regression Results- Simultaneous Equation Models— Simultaneous Equation Bias— Inconsistency of OLS Estimators— Identification Problem—Test of	5	1
	2.3	Problem of Estimation—Single Equation Methods —OLS—ILS— 2SLS and Systems Methods—2SLS and SURE Model— Lurking Variables (Basics Only)	5	4
3		<b>Dynamic econometric models</b>	<b>15</b>	
	3.1	Estimation of Distributed Lag Models— Koyck Model and its rationalization— Partial Adjustment and Adaptive Expectations Model—Almon Approach	6	2
	3.2	Estimation of Auto Regressive Models— Instrumental Variables—Method of Instrumental Variables—Problems—SARG Test and Durbin h Statistic)	6	3
	3.3	Causality-The Granger Causality Test and Sims Test (Basics Only	3	1
4		<b>Panel Data Models</b>	<b>20</b>	
	4.1	Nature and Data Sources—Constant coefficients Model—Error Components Models—Fixed Effect (Lest Squares Dummy Variable LSDV) Model—Fixed Effect (Within Groups WG) Estimator— Random Effects Model (REM)—REM and Hausman Test—Breusch-Pagan Test— Consistency Property of Estimators.	10	1
	4.2	Dynamic Panel Data Analysis—Panel Data Unit Root—Cointegration Tests	5	3

	<b>4.3</b>	Panel Data Estimation Techniques-Pooled OLS regression in panel data-Feasible Generalized Least Squares (FGLS)- Maximum Likelihood Estimation (MLE) in panel data models (Concepts Only)	5	3
	<b>Practicum</b>	Students may try to Specify Non Parametric and Semi Parametric models Formulate Multiple Regression with data collected from local economy Develop any of the above specified models Implement panel data analysis using statistical software (e.g., Stata, R, Python)/Analyzing real-world datasets employing fixed effects, random effects, and dynamic panel data models/Interpreting and presenting results from panel data estimations

**Discipline Specific Elective – DSE**  
**Agriculture Economics**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>
Programme	BA (Hons) Economics
Course Name	Agriculture Economics

Type of Course	Discipline Specific Elective – DSE						
Course Code	M24EC6DSE301						
Course Level	300-399						
Course Summary	This course covers the fundamental concepts in agricultural economics, emphasizing their interconnectedness with the agricultural sector's development, and explores the historical context of agricultural development, examining the transition of production relations in the agricultural sector from pre-capitalism/feudalism to capitalism. Additionally, the course equips students with the ability to analyze agricultural market dynamics and trends, facilitating informed decision-making in crop selection, production, and sales, while also nurturing entrepreneurial skills in agribusiness management with a focus on local knowledge and sustainable practices within the agricultural sector.						
Semester	6					Credits	4
Course Details	Learning Approach	Lecture	Tutorial	Practicum	Others	Total Hours	
		45	0	30	0	75	

### Course Outcomes

CO No:	Expected Course Outcome <i>Upon completion of this course, the students will be able to:</i>	Learning Domains	PSO No:
1	describe the fundamental concepts of agricultural economics, elucidating their interconnectedness with the development of the agricultural sector	U	3,6
2	examine the historical context of agricultural	E	2,3,6

	development, considering how past practices and policies have shaped current agricultural practices		
3	analyse agricultural market dynamics and market trends, to make informed decisions related to crop selection, production, and sales	An	2,3,6
4	develop entrepreneurial skills in agribusiness management using local knowledge and sustainable practices in the agricultural sector.	An	1,3,4

### COURSE CONTENT

Content for Classroom transaction (Units)

Module	Units	Course Description	Hours	CO.NO
1		<b>Introduction to Agricultural Economics</b>	<b>20</b>	
	1.1	Agricultural Economics – meaning - definition- subject matter	5	1
	1.2	Contribution of agriculture in Economic Development. Instability, Risk and Uncertainty in Agriculture	5	3
	1.3	Farm management and Production economics - Meaning, definition, and scope - Optimal factor combination - application of the Law of technical substitution	10	6
2		<b>Agricultural Growth in India</b>	<b>15</b>	
	2.1	Agricultural growth in India since independence –cropping pattern shifts -- Green Revolution-second generation green revolution	10	3
	2.2	Globalization and the Indian agriculture	5	4
3		<b>Agriculture Finance and Marketing</b>	<b>20</b>	
	3.1	Agricultural Marketing and its Importance- Marketing functions – Classifications of agriculture market -Marketable and	10	6

		Marketed Surplus; Marketing Channels; Regulated Market; Private market-; Direct marketing, Organized Retailing – Problems of Agricultural marketing		
	<b>3.2</b>	Farmer Producers Organizations (Agricultural cooperatives); Agricultural Value Chains Agricultural finance- sources: institutional and non-institutional- NABARD: role and functions. Crop	5	1
	<b>3.3</b>	Factors affecting demand for and supply of farm products -Market intermediaries and its regulation.	5	4
<b>4</b>		<b>Farm Management</b>	<b>20</b>	
	<b>4.1</b>	Farm management- Principles of farm management–Farm management decisions– principles of factor substitution	5	2
	<b>4.2</b>	Cost Principles – Opportunity Cost Principle – Principles of Comparative Advantage – Limitations of Farm Management.	5	2
	<b>4.3</b>	Measures of Farm Efficiency - Size of the Farm and Productivity	5	1
	<b>4.3</b>	Innovative practices in farming: Integrated farming, contract farming, organic farming, precision farming, [concepts only]	5	3

	<b>Practicum</b>	<p>Meet with a farmer to understand their current farming practices, crop type, and average yield and issues faced. Collect data on: Current costs of labor and fertilizer per unit, Historical crop yields associated with different input levels (if available), Market prices for the crops produced.</p> <p>Research the concept of globalization and its impact on agricultural markets. Collect data on historical price trends for major/any of the agricultural commodities grown in India. Students can utilize data from government sources or agricultural market databases. Report the impact of globalization</p> <p>Analyze the role of NABARD in Supporting a Specific Agricultural Project in Kerala</p> <p>Research and gain a solid understanding of each innovative farming practice such as Integrated farming, Contract farming, Organic farming, Precision farming Aquaponics, Hydroponics etc Evaluate the impact of the practice on factors like: Sustainability (environmental impact, soil health),Productivity (yield, resource efficiency),Profitability (economic viability for the farmers)Social impact (working conditions, community involvement)</p>

**Discipline Specific Elective – DSE**  
**Fundamentals of Fintech Entrepreneurship**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>
Programme	BA (Hons) Economics
Course Name	Fundamentals of Fintech Entrepreneurship
Type of Course	DSE
Course Code	M24EC6DSE301
Course Level	300-399
Course Summary	This course offers an overview of the fintech industry and the entrepreneurial ventures that are driving innovation within it. Core objective of the course is to provide students with a solid foundation in fintech concepts, technologies, and business strategies, preparing

	them to analyse the trends and forces that are conditioning fintech enterprises. The course is designed with a focus on startup dimensions of the dynamic and vibrant Indian fintech industry and hence the various fintech concepts, underlying technology and the regulatory issues involved are provided in the Indian context.

Module	Units	Course description	Hours	CO.NO
<b>1</b>		<b>Overview of the Fintech Sector</b>	<b>15</b>	
	<b>1.1</b>	Overview of financial technology (Fintech): Definition, evolution, and importance-Traditional versus digital finance-Trends and opportunities in Indian Fintech industry: Payments, lending, insurance, etc-Scenario of digital lending in India.	5	1
	<b>1.2</b>	Digital Public Infrastructure (DPI) in India and its development role-India Stack-ONDC-RBI Innovation Hub.	5	3
	<b>1.3</b>	Use of various technologies including AI in different areas of financial services like client onboarding, loan disbursement, recovery and customer interfaces-Robo advisors in wealth management services-DPI and other platforms that support fintechs: Aadhar verification, KYC norms-Video KYC, Payment infrastructure, CIBIL ScoreCIBIL Microfinance score.	5	2
<b>2</b>		<b>India's Financial Services Industry -a Fintech angle Overview</b>	<b>20</b>	
	<b>2.1</b>	Overview of the Indian financial services industry: Banks, NBFCs, MFIs, Payment banks and Small Finance Banks, Peer-to-Peer (P2P) Lending Platforms, Loan apps (risk and regulations), Crowdfunding-Account Aggregators.	5	1
	<b>2.2</b>	Overview of the Fintech industry in India-Leading categories of fintech firms (payments firms, lending tech, insure tech, neo banks, fintech Saas etc.) - Banks adopting financial technologies- Complementarities and	10	5

		Competition between banks, NBFCs and fintech firms in the Indian context-Fintech firms as financial sector disruptors.		
	<b>2.3</b>	Design thinking for a fintech: Need for a user centric approach – Business model canvas and value proposition design-Revenue models: subscription, transaction fees etcSurvey of technological and digital tools for a fintech startup.	5	3
<b>3</b>		<b>Electronic Money-Cryptocurrencies and Blockchain Technology</b>	<b>20</b>	
	<b>3.1</b>	Electronic Money and Cryptocurrencies-CBDC-e-Rupee Types of cryptocurrencies/assets-Difficulties in regulating cryptocurrencies-Global attempts to regulate crypto assets.	<b>10</b>	<b>1</b>
	<b>3.2</b>	Crypto currencies: Currency vs asset nature-Risks of cryptocurrencies-Crypto Exchanges-Crypto crisis in the recent past-Case study of the fall of FTX.	<b>5</b>	<b>3</b>
	<b>3.3</b>	Block chain technology-Challenges and opportunities of block chain technology-Applications of block chain technology in the financial sector.	<b>5</b>	<b>3</b>
<b>4</b>		<b>Regulatory landscape for fintech in India</b>	<b>20</b>	
	<b>4.1</b>	Regulatory Framework for Fintech industry: Need for regulation-Need for harmony between regulation and innovation-RBI approach to fintech regulation -Regulatory Sandboxes-Financial stability and the fintech sector.	7	1
	<b>4.2</b>	Importance of Self-Regulatory Organizations (SRO) in fintech landscape-Fintech Repository	5	3

	<b>4.3</b>	Property insurance- meaning-Types Features- Liability insurance-meaning- scope Types- Rating- Legal aspects of Liability insurance	3	6
	<b>4.4</b>	Evolution of India's digital payment Ecosystem-Components of India's Digital payment ecosystem -Role of NPCI- Uniqueness of UPI-Internationalization of UPI Comparison of UPI with other major digital payments systems across the world.	5	1
	<b>Practicum</b>	<p>1. Map out the various components of DPI in India and demonstrate how they helped and supported the birth and rapid proliferation of fintechs for financial institutions and the fintech firms.</p> <p>2. Illustrate the operational aspects of CIBIL score.</p> <p>3. Map the different types of fintech enterprises operating in India.</p> <p>4. Explore and demonstrate the interdependence between banks, NBFCs and fintech firms in the Indian context.</p> <p>5. Give ideation and provide a suitable business model for a potential fintech startup.</p> <p>6. Classify the different types of crypto assets. Compare and contrast crypto assets with CBDC.</p> <p>7. Analyse the failure of FTX and the message it left to the financial regulators</p> <p>8. Discuss the need for drawing a balance between regulation and innovation support of fintechs.</p> <p>9. Elaborate the unique advantages of UPI as a rockstar in the global fintech arena.</p>

**Discipline Specific Elective – DSE**

**Behavioural Economics**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>		
Programme	BA (Hons) Economics		
Course Name	Behavioural Economics		
Type of Course	DSE		
Course Code	M24EC6DSE304		
Course Level	300-399		
Course Summary	This course presents the principles of behavioral economics and their significance in economic decision-making, especially in situations involving risk, uncertainty, and strategic interactions. The focus is on elucidating economic decisions that diverge from the forecasts of neo-classical economics. The course endeavors to integrate perspectives from sociology, institutions, and evolutionary psychology to comprehend human behavior, providing guidelines for improved developmental outcomes. Additionally, it explores conventional research methods in the field, such as laboratory and field experiments, and examines their role in advancing the subject.

**Skill Enhancement Course (SEC)**

**Digital Economy Skills for Enterprise Development**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>
Programme	BA (Hons) Economics
Course Name	Digital Economy Skills for Enterprise Development
Type of Course	Skill Enhancement Course (SEC)
Course Code	M24EC6SEC300
Course Level	300-399
Course Summary	<p>This course is designed to foster digital enterprise development and impart skills among students within the evolving landscape of digital economy. An innovative approach of blending the methodology of economics with the leading trends in the digital world is adopted in the context of the requirements of skill enhancement. The primary objective is to impart basic knowledge and enhancement of skills in digital tools, and platforms which are essential for initiating digital business enterprises. The syllabus adopts an interdisciplinary approach; keeping the core traits of Economics; aiming to provide students with a comprehensive understanding of digital entrepreneurship and guiding them to acquire the digital entrepreneurial skills in the framework of social science discipline. Regarding the overall approach, the content should be delivered focusing on applying the digital techniques from a user angle by integrating the core economic message. Core economic concepts should be integrated into the technological landscape. Teachers should use the basic concepts of microeconomics to interpret several of the digital developments and hence are to be explained in the context of the market mechanism angle wherever necessary. Various software tools mentioned in this course need not be purchased to provide the information; rather, a demonstration about their profile, features etc. with the help of the internet is sufficient.</p>

Module	Units	Course Description	Hours	CO.NO
1		<b>Platforming an enterprise in the digital economy</b>	15	
	1.1	Scope and significance of digital economics and digital economy- key features of digital economy-Enterprise development in the digital economy era: opportunities and challenges.	5	1
	1.2	The rise of platform economy-various digital enterprise technologies -mobile-e-commerce, social media, Cloud, AI, automation and Block		

		chain.		
	1.3	Network Economics-meaning, importance- Network economies of scale-Social networking, user base development and branding using social media for business-Digital business transformation.		
	1.4	Enterprise Development tools and platforms- Google Business Profile, Google Workspace, Google Analytics-Map API (concepts only)- Economic and business benefits of digital platforms.	5	3
2		<b>Basic tools for digital economy management</b>	<b>15</b>	
	2.1	Pricing of digital products-Enterprise development tools: Office 365, Cloud for storage-HRM Software and their use in Enterprise Management.	4	1
	2.2	Economic benefits of digital platforms for work, marketing etc - Digilocker-Government E-Market Place (GEM)-Uses of Content Management Systems-LMS.	4	3
	2.3	Websites for Enterprises-Domain Registration- Storage-Control Panels (concepts only) Apps and their significance in business.	3	2
	2.4	Role of ecommerce payment gateways (concept only)-Online stores: steps for creation- UPI payment ecosystem-Aadhar verification services.	4	5
3		<b>Branding and security in the digital economy and Economics of AI and Robotics</b>	<b>15</b>	
	3.1	Economic benefits of digital branding-Digital branding and advertising using social media- Major social media platforms: Meta, LinkedIn, YouTube, Google ad sense-ads manager/ad	5	1

		settings.		
	<b>3.2</b>	Technological progress and productivity expansion-A survey of productivity enhancing digital tools- AI and IoT devices in enterprise management-Economic implications of large language models and neural networks-Different AI applications in industry, services (including education) and agriculture.	5	2
	<b>3.3</b>	Business risks in the digital world: Digital Security-Digital Privacy-Data Security -User Authentication and Authorisation-IPR and Digital Rights-Ethical, Safety, Security, and other principles-Social Engineering Attacks-Government Regulations in India regarding Digital Security.	5	4

#### **Foundation Component - VAC**

#### **Environmental, Social and Governance**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	<b>Environmental, Social and Governance</b>					
Type of Course	Foundation Component - VAC					
Course Code	M24EC6VAC300					
Course Level	300-399					
Course Summary	<p>This course delves into the Environmental, Social, and Governance (ESG) framework, focusing on its three pillars. It explores the UN's Principles for Responsible Investment and examines ESG within the corporate sector, particularly its role under Corporate Social Responsibility. The module covers GRI-Business Responsibility Reporting and the Nine Principles of Business Responsibility and Sustainability Report. Additionally, it discusses ESG-related regulations in India. The second part of the course addresses economic instruments for climate change, including concessional finance, blended finance, and green bonds, along with fundamentals of carbon pricing. The third section explores ESG disclosures, emphasizing the importance and challenges, as well as the concept of circular economy and its 10Rs. The course concludes by examining the Sustainable Blue Economy and the climate change threats faced by India's coastal areas.</p>

Course Name	Micro Economics-II					
Type of Course	Discipline Capstone Component (Advanced) - DSC					
Course Code	M24EC7DCC400					
Course Level	400-499					
Course Summary	<p>This course equips the learners to analyze consumer behavior with powerful tools like demand theory, unravel production mysteries through models like Cobb-Douglas, and navigate uncertainty with theories like the Neumann-Morgenstern Utility Index. Master pricing strategies and game theory tactics to understand competitive dynamics. Explore the concept of income distribution with theories from Ricardo to Kaldor, then critically evaluate welfare theories and apply them to contemporary issues like the Easterlin Paradox. This course equips learners with the analytical skills to understand the core principles of economic behavior and its impact on society.</p>

**Macro Economics-II**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>
Programme	BA (Hons) Economics
Course Name	Macro Economics-II

Type of Course	Discipline Capstone Component (Advanced) - DCC					
Course Code	M24EC7DCC401					
Course Level	400-499					
Course Summary	<p>The advanced macro-economic theory and policy studies the dynamics of fundamental macroeconomic variables and interdependence between them. Basic models of macroeconomics are introduced to examine economic fluctuation and stabilization policies. It also touches upon other issues such as the internationalization of macroeconomics. The primary end of the course is to enable the students to get better acquaintance with nitty –gritty of methods and models of Macroeconomics. There will be a special concern to critically evaluate the validity of these Models to enunciate the changes in these key macroeconomic variables in real economies. Students are exposed to both macroeconomic theory and contemporary macroeconomic issues. The functioning of the economy as a whole is analyzed from the point of view of competing schools of macroeconomic thoughts</p>

**Discipline Capstone Component Elective– DSE**

**Public Economics II**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>
Programme	BA (Hons) Economics
Course Name	Public Economics II
Type of Course	Discipline Capstone Component Elective– DSE
Course Code	M24EC7DSE400
Course Level	400-499
Course Summary	The study of Public Economics and Indian Public Finance explores government intervention's impact on economic efficiency and equity. It delves into taxation, public goods, externalities, and welfare economics. Indian Public Finance focuses on the fiscal policies and challenges specific to India, including tax structures, subsidies, and government expenditure. Emphasizing economic development and social welfare, it analyzes the Indian economy's fiscal aspects, considering federalism, public debt, and budgetary policies.

**Discipline Specific Elective – DSE**

**Resource Economics and Environmental Accounting**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>
Programme	BA (Hons) Economics
Course Name	Resource Economics and Environmental Accounting
Type of Course	Discipline Specific Elective – DSE
Course Code	M24EC7DSE402
Course Level	400-499
Course Summary	The course "Resource Economics and Environmental Accounting" is designed to impart higher-level procedural knowledge aligned with revised Bloom's Taxonomy. explores the intersection of economics, natural resource management, and environmental sustainability. The initial unit provides an overview of the utilization and inventory of resources, delving into the evolving landscape. Subsequently, the focus shifts towards a critical examination of the sustainability concept in relation to environmental preservation. The fourth unit undertakes a comparative analysis between the traditional national income system and green accounting. The final unit (V) sheds light on the pivotal role of human resources, exploring their dynamic nature. The curriculum often addresses topics such as environmental economics, the valuation of ecosystem services, policy analysis for sustainable development, and the economic implications of resource depletion. The goal is to equip students with the knowledge and analytical tools to understand, evaluate, and contribute to sustainable development efforts in the

	context of resource management.

## **International Finance**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	International Finance					
Type of Course	Discipline Specific Elective -DSE					
Course Code	M24EC7DSE404					
Course Level	300-399					
Course Summary	<p>The course provides a comprehensive overview of international finance, emphasizing its importance and its connections to global trade and business. It covers key topics such as the International Monetary System and reserve currencies, exploring their role in facilitating trade and investment. Discussions also include the IMF's function in maintaining global liquidity and the impact of private capital mobility. The course addresses exchange rate systems, balance of payments components, and the implications of currency convertibility, particularly in India. It examines the foreign exchange market, risk management strategies, and the relationship between inflation, interest rates, and exchange rates. Additionally, it discusses international capital movements, focusing on FDI, FPI, multinational corporations, and global financial institutions. Finally, it touches on new institutions, currency internationalization, and the role of international cooperations like the G20, BRICS, and the Financial Stability Board in shaping the global economic landscape.</p>

**Artificial Intelligence and the Economy**

**Mar Athanasius College (Autonomous),  
Kothamangalam  
FYUGP SYLLABUS**

Programme	BA (Hons) Economics					
Course Name	Artificial Intelligence and the Economy					
Type of Course	Discipline Specific Elective – DSE					
Course Code	M24EC7DSE404					
Course Level	400-499					
Course Summary	<p>This course explores the transformative impact of artificial intelligence (AI) on the economy, offering students a comprehensive understanding of how AI technologies are reshaping various sectors. Through a blend of theoretical foundations and practical case studies, students will examine AI's influence on productivity, employment, market dynamics, and economic policies. The curriculum also touches the ethical considerations and economic challenges posed by rapid technological advancement, equipping students with a foundational level knowledge to evaluate AI's potential and risks. By the end of the course, students will be able to articulate informed perspectives on AI's role in future economic landscapes and its implications.</p>

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>
Programme	BA (Hons) Economics
Course Name	Development Economics -II
Type of Course	Discipline Capstone Component - DCC
Course Code	M24EC8DCC401
Course Level	400-499
Course Summary	This course offers a comprehensive exploration of theoretical paradigms in economic development. It addresses the demands of a rapidly evolving global economy by integrating interdisciplinary perspectives, incorporating cultural, political, and social dimensions. Despite its interdisciplinary nature, the course grounds students in the logic and theoretical framework of standard economic analysis. Objectives include familiarizing students with conceptual routes, theoretical dynamics, and practical strategies for growth and development. The course aims to orient students toward major development themes,

	encourage systematic inquiry, and equip them with analytical knowledge. Ultimately, students should critically evaluate growth theories, demonstrate understanding of recent literature on underdevelopment and growth, and assess results related to development issues.

**Statistical Methods for Economic Analysis -III**

**Mar Athanasius College (Autonomous), Kothamangalam**  
**FYUGP SYLLABUS**

Programme	BA (Hons) Economics					
Course Name	Statistical Methods for Economic Analysis -III					
Type of Course	Discipline Capstone Component (Advanced) Elective– DSE					
Course Code	M24ST8DCE400					
Course Level	400-499					
Course Summary	This course delves into advanced statistical methods used in economic analysis. It aims to provide students with a robust understanding of statistical techniques and their applications in economic research. The course will cover both theoretical concepts and practical applications, with the final module dedicated to hands-on practice using appropriate statistical software.

**Economics of Health and Education**

	<b>Mar Athanasius College (Autonomous), Kothamangalam</b> <b>FYUGP SYLLABUS</b>					
Programme	BA (Hons) Economics					
Course Name	Economics of Health and Education					
Type of	Discipline Capstone Component Elective– DSE					
Course Code	M24EC8DCE401					
Course Level	400-499					
Course Summary	The importance of education and health in improving wellbeing is reflected in their inclusion among the Millennium Development Goals adopted by the United Nations member states, which include among other goals, achieving universal primary education, reducing child mortality, improving maternal health and combating diseases. This course provides a microeconomic framework to analyze, among other things, individual choice in the demand for health and education, government intervention and aspects of inequity and discrimination in both sectors. It also gives an overview of health and education in India and Kerala
